

Health Guarantee

Buyer in this contract refers to the purchasing party, _____ . Seller in this contract refers to the selling party, Adam & Jeannie Shero.

Initial Health Guarantee: The puppy you are purchasing is guaranteed to be in good health at the time of sale, with first vaccine and a series of de-worming given. This is all recorded on the health record you'll receive today. Good Health is defined in the guarantee as, to be free of serious illness or genetic defects that will shorten your dog's life.

Should your puppy be deemed to not be in good health the puppy will be accepted back and the original purchase price of the puppy will be refunded. We will not refund any additional cost the buyer, including shipping, tax or medical expenses.

Terms of the Initial Health Guarantee:

1. A veterinarian must examine the puppy within 5 business days of receiving this guarantee at buyer's expense.
2. All vaccinations must be performed on schedule and documented by the buyer for 12 months after pick-up.
3. Upon finding by a licensed veterinarian that there is a serious illness or genetic defect that alters the life of the puppy, the buyer must notify SELLER within 72 hours
4. The puppy must be returned to SELLER within 10 days of the notification at the buyers' expense.
5. SELLER reserves the right to have the puppy examined by a licensed veterinarian of its choice at the expense of SELLER. Should there be a discrepancy between the buyers and SELLER's licensed veterinarian's findings, SELLER's veterinary findings shall control.
6. Heartworm prevention medication begins on a monthly basis after 8 weeks of age and continues up to 12 months after pick-up.
7. A female puppy cannot be spayed prior to the age 10 months. Spaying a female too young can lead to kidney & urinary tract problems. Spaying can also stunt the physical development of female's body.

Should any of the above-enumerated terms not be met, the Initial Health Guarantee will be void.

Genetic Health Guarantee

Serious illness and life altering genetic defects will be defined by the common usage within the dilute toy poodle breeding industry. Examples include but are not limited to: Parvo, Distemper and Corona.

Serious illness and genetic life altering defects do not include umbilical hernia, external or internal parasites or bacteria, coccidiosis, giardia, undescended testicles, inverted vulva, under bite or overbite. The preceding list of illnesses and defects are not an exhaustive list. SELLER also does not make any guarantee or warranty to the puppy's personality or disposition although we have made a good effort to ensure your puppy has been well socialized and introduced to many sights, textures and sounds before going to his/her new home.

Genetic Health Guarantee: The puppy you are purchasing is guaranteed to be in good health and free of genetic life-threatening illness that result in death for one year from the date of pick-up. Should your puppy die from a genetic life-threatening illness in the first year from the day of pick-up, SELLER will give a refund; limited to the purchase price of your puppy. SELLER will not refund any additional cost to the buyer, including shipping, tax or medical expenses.

Terms of the Genetic Health Guarantee:

1. A licensed veterinarian must determine the cause of death. It is up to the buyer to provide evidence that cause of death was genetic.
2. Upon finding by a licensed veterinarian that there is a genetic defect that caused the puppy's death, the buyer must notify SELLER within 72 hours.

Should any of the above-enumerated terms not be met, the Genetic Health Guarantee will be held void.

Hip Guarantee

SELLER guarantees buyers puppy to be free of hereditary hip dysplasia or Legg-Calve-Perthes Disease for 12 months after the date of pick-up. Should the puppy be found to have hereditary hip dysplasia or Legg-Calve-Perthes Disease within 12 months after the date of pick-up, SELLER will refund the buyer \$500.00 to be used toward hip surgery for the puppy. SELLER will not be responsible for any additional cost or damages, including shipping, medical or travel expenses.

Terms of the Hip Guarantee:

1. The puppy must not be allowed to become obese.
2. The puppy must not have suffered any trauma prior to the exam.
3. The puppy must be given exercise, yet, not excessively. Buyer agrees not to start agility, heavy or competitive field training, or any activity which may damage the puppy's bone or muscle structure until he has reached a minimum of 12 months in age. (Puppy needs to reach physical maturity which helps prevent such activities from damaging the body)
4. The puppy has not suffered abuse or mistreatment.
5. The puppy may not have sired/whelped a litter prior to the testing of their hips.

Should any of the above-enumerated terms not be met, the Hip Guarantee will be void.

Lifetime Guarantee

The parents of the puppy you are purchasing today have been cleared of genetic defects by parentage. SELLER guarantees your dog will never suffer from:

1. DM - Degenerative Myelopathy
2. PRA – Progressive Retinal Atrophy

Terms of the Lifetime Guarantee:

1. A licensed veterinarian must diagnose the illness. It is up to the buyer to provide evidence that proves your dog has the disease from testing done.
2. Upon finding by a licensed veterinarian that your dog has one of the listed diseases, the buyer must notify SELLER within 72 hours
3. All the dogs vet records, etc. must be sent to SELLER's vet for his opinion to determine if your dogs has one of the listed illnesses.
4. Should there be a discrepancy between the buyers and SELLER's licensed veterinarian's findings, SELLER's veterinary findings shall control.
5. Should the puppy be found to have PRA or DM within 9 months after the date of pick-up, SELLER will refund the buyer \$500.00

Should any of the above-enumerated terms not be met, the lifetime guarantee will be held void.

Full Registration: (OPTIONAL)

Your puppy was sold you to on full registration which means your puppy born from Sophia and Tux are not restricted from producing a litter.

What's Next?

Your puppy needs a series of 4 vaccines given to protect them against canine distemper, canine hepatitis, adenovirus cough (kennel cough), par influenza, and parvovirus. We have given them the first vaccine in the series. The next vaccinations are due at 9, 12 and 16 weeks. Your puppy will also get their rabies vaccine at age 16 weeks. Heartworm preventive should also be given monthly.

Socializing:

You need to be careful where you take your puppy places before they have all their vaccines. Do not take them to dog parks or let them down on the floor in a pet store. Do take them to your friend's house, walks in your neighborhood and to puppy classes. It is critical to socialize your dog when they come home until 16 weeks old if you want a well-rounded dog. We have introduced them to many sights and sounds. Continue to introduce them to new things in your daily life. Doggy daycare is a fun place to send your puppy a couple days a week while young. This will help them get along with all other dogs for their entire life.
